

January 29<sup>th</sup> 2016

Conference

## *2D Materials, Graphene and other Carbon Nanoforms*

**10:00 Nazario Martín.** Universidad Complutense de Madrid.  
*Supramolecular Chemical Modification of Graphene with Electroactive Systems.*

**10:30 Samuel Mañas.** ICMol, Universitat de València.  
*From our world to Flatland via the transition metal chalcogenides highway.*

11:00 Coffee break

**11:30 Fernando Langa.** Universidad de Castilla La Mancha.  
*Tuning of the Work Function of Graphene by Chemical Functionalization.*

**12:00 Ángela Sastre.** Universidad Miguel Hernández.  
*Exfoliation and supramolecular functionalization of graphene with perylenediimides.*

**12:30 Tomás Torres.** Universidad Autónoma de Madrid.  
*Phthalocyanine and subphthalocyanine containing carbon nanostructures.*

**13:00 Luis Echegoyen.** University of Texas at El Paso  
*Derivatization of Empty and Endohedral Fullerenes*

**13:30 Eugenio Coronado.** ICMol- Universitat de València  
*Conclusion*

**Venue: Seminario 0.8**

Instituto de Ciencia Molecular (ICMol)

Parc Científic de la Universitat de València (Campus Burjassot-Paterna)

**Supported by:**
